

LEROY GARVIN JR

AI Operations Specialist | Savannah, Georgia, USA | Open to Remote
(912) 901-6378 · AlignedVibesCo@gmail.com · linkedin.com/in/leroy-garvin-49443b423

PROFESSIONAL SUMMARY

Owner and operator of Right Outside Auto Detailing LLC with hands-on experience independently designing and testing AI-assisted customer service workflows. Designed and iteratively refined conversation logic, prompts, business rules, and workflow documentation for an AI voice booking assistant. Designed and tested no-code automation workflows using n8n and Airtable. Uses ChatGPT and Claude to prototype workflows and improve AI-assisted systems through structured testing and continuous improvement.

CORE SKILLS

AI Workflow Design · Prompt Engineering · Conversational AI Testing · AI Quality Assurance · Root Cause Analysis · Process Documentation · Workflow Automation · No-Code Automation (n8n, Airtable) · Business Rules Design · Continuous Improvement

PROFESSIONAL EXPERIENCE

Owner & AI Operations Specialist

Right Outside Auto Detailing LLC — Savannah, Georgia, USA | Present

- Own and operate Right Outside Auto Detailing LLC, managing customer service operations and day-to-day processes.
- Independently design, test, and improve AI-assisted customer service workflows for booking, qualification, pricing confirmation, and experience quality.
- Develop conversation logic, prompt strategies, business rules, and workflow documentation for an AI voice booking assistant.
- Design and test no-code automation workflow concepts using n8n and Airtable for stage/status tracking.
- Conduct structured conversational AI testing; perform root cause analysis and iterative prompt refinement.
- Document issues, fixes, and process improvements to support AI quality assurance and continuous improvement.

PROJECTS

AI Voice Booking Assistant

Functional Build · Conversational AI Testing · Prompt Engineering · AI QA

- Built a 10-stage booking flow with one-question-at-a-time control and confirmation checkpoints.
- Applied a structured QA methodology: define expected behavior, test, classify failures, root cause, fix, retest, document.
- Documented qualitative reduction of loops, repeated questions, and pricing confirmation gaps through iterative testing.

GH-X — Digital Product Automation System

Functional Build · Workflow Automation · AI Operations · Process Documentation

- Designed multi-stage automation architecture: ideation, listing/prompts, visuals, commerce drafts, social, video, feedback, reliability.
- Configured n8n workflow definitions and Airtable queue/status planning (definition-level evidence; production metrics not claimed).
- Developed stage-specific prompt strategies with constraints and review points; documented improvements.

TOOLS & PLATFORMS

ChatGPT · Claude · n8n · Airtable · Twilio (documented voice stack) · Cursor · Prompt Engineering · Workflow Design · Process Documentation

ADDITIONAL

- Open to remote AI Operations, AI Trainer, AI QA, Prompt Engineering Support, Workflow Automation, Conversational AI Tester, and AI Support Engineer roles.
- No invented employers, certifications, revenue, or production metrics. References available upon request.
